PRODUCT DESIGNER (UX/UI)

Product Designer with experience in UX/UI, visual communication, and interactive systems. Skilled in transforming complex information into intuitive user experiences through behavioral design and research-driven workflows.

TECHNICAL SKILLS

Design	: UX/UI Design, Wireframing, Interaction Design, Responsive Design, Information Architecture
Tools	: Figma, Adobe CC, Blender, Substance Painter
Web	: HTML, CSS, JavaScript
Creative	: Photography, Storyboarding, Visual Storytelling
Methods	: User Research, Usability Testing, UX Analysis, Prototyping, Cognitive Walkthroughs

EXPERIENCE

UX Analyst & Content Strategist (Project-Based) <i>Grido (Remote – Munich, Germany)</i>	Jan 2025 – Mar 2025
- Identified usability bottlenecks and navigation friction on an AI-driven content platform through cognitive walkthroughs and UX analysis. - Assessed user flows and interaction patterns, delivering structured wireframe recommendations that simplified navigation paths. - Organized automotive datasets into clear content categories, improving search findability and user orientation.	
Freelance UX/UI Designer <i>Independent Practice – Mumbai, India & Dublin, Ireland</i>	Aug 2022 – Oct 2025
- Shaped UX and UI systems, wireframes, and responsive layouts for multiple e-commerce platforms and digital products. - Established scalable design systems and brand architectures that improved production efficiency across client teams.	
Creative Director <i>Wesualize Studios – Kochi, India</i>	Nov 2023 – Feb 2024
- Led creative execution for VFX advertising campaigns from concept development through final delivery. - Crafted storyboards combining 3D environments and live-action, coordinating multidisciplinary artists and production teams. - Oversaw production pipelines to ensure consistent, on-time delivery of cinematic assets under tight schedules.	
Design Intern <i>Tata Consultancy Services (TCS) – Mumbai, India</i>	Jun 2022 – Aug 2022
- Studied interaction patterns in immersive virtual environments to optimize spatial usability and task workflows. - Produced high-fidelity 3D concepts and assets in Blender informed by user research and prototype testing. - Presented interactive design frameworks to senior stakeholders for integration into engineering roadmaps.	
Visual Designer <i>YoZu – Mumbai, India</i>	Dec 2020 – Jan 2022
- Delivered optimized 3D assets and interface components in close collaboration with front-end and Unity engineering teams. - Streamlined studio production workflows and reduced cross-team integration friction through consistent asset handoff processes. - Supported and guided junior digital artists while tracking project milestones within agile production schedules.	

PROJECTS

Hiro — Task Starting Assistant	<i>Product Design, UX, Behavioral Design</i>
- Created a behavioral productivity assistant aimed at reducing task-initiation friction through micro-step workflows. - Ran 1:1 interviews and think-aloud testing to uncover common avoidance patterns around starting tasks and refined micro-step flows accordingly. - Defined an interaction framework that combines task breakdowns, energy-level matching, and automated guidance.	
DUB Transit	<i>UX Design, Information Design, Urban Mobility</i>
- Investigated commuter pain points in Dublin public transit using contextual inquiries and interviews with regular bus and Luas riders. - Shaped a real-time transit interface that offers alternative route suggestions during service disruptions, focusing on glanceable cards for rapid decision-making. - Ran usability tests with 32 participants; all reported they would use the prototype for daily commuting, with several requesting a darker palette and dedicated dark mode for night use.	
City: Beneath the Surface	<i>Data Visualization, UX Design, Interactive Media</i>
- Built an interactive visualization exploring underground city infrastructure and essential urban workers. - Turned complex civic datasets into step-by-step visual narratives, allowing visitors to drill down from a city overview into specific worker roles. - Observed visitors during the exhibition and gathered informal feedback; many spent several minutes exploring multiple layers, which validated the layered navigation model.	
AI as Coding Companion — Personal Portfolio Website	<i>UX Design, Front-End Development, AI-Assisted Workflow</i>
- Planned and implemented a responsive portfolio site using AI-assisted front-end workflows and iterative prototyping. - Defined information architecture, layout grids, and interaction patterns in Figma before development. - Carried out cross-browser responsive testing and refined layout consistency across multiple device sizes.	

EDUCATION

TU Dublin – Ireland	Sep 2024 – Oct 2025
<i>MA Creative Arts – Visual Communication</i>	<i>EQF Level 7</i>
- Concentrated on visual communication, research methodologies, and design for care and urban systems. - Graduation project: Data visualization examining essential urban workers and city infrastructure.	
Indian Institute of Technology Bombay	Jul 2019 – Jul 2023
<i>Bachelor of Design (Communication Design)</i>	<i>Grade: 8.04</i>
- Studied human-centered design, visual storytelling, interactive media, and immersive digital experiences - Graduation project: VR interactive experience involving 3D asset creation and Unity collaboration.	

ADDITIONAL EXPERIENCE

Aircraft Appearance Crew	Jan 2026 – Present
<i>Sky Handling Partner – Dublin, Ireland</i>	
Uphold international safety and hygiene standards within fast-paced aircraft turnaround operations.	
Food & Beverage Associate	Oct 2025 – Jan 2026
<i>St Helen’s Hotel – Dublin, Ireland</i>	
Provided high-volume guest service in a luxury hospitality environment while maintaining operational efficiency.
