PRODUCT DESIGNER (UX/UI)

Product Designer with a background in UX design, visual communication, and 3D media. Experienced in designing user-centered digital products, interactive systems, and data-driven interfaces. Skilled at transforming complex information into intuitive experiences, with a focus on behavioural design and reducing user friction.

TECHNICAL SKILLS

Design	: UX Design, Interaction Design, Visual Communication, Information Design
Tools	: Figma, Adobe CC, Blender, Substance Painter
Web	: HTML, CSS, JavaScript
Creative	: Photography, Storyboarding, Visual Storytelling
Methods	: User Research, UX Analysis, Prototyping, Content Structuring

EXPERIENCE

UX Analyst & Content Strategist <i>Grido (Remote – Munich, Germany)</i>	Jan 2025 – Mar 2025
- Conducted UX analysis on an AI-driven content platform, identifying usability issues and navigation friction. - Evaluated user flows and interaction patterns, contributing structured feedback to improve product clarity. - Structured complex automotive content into accessible, browsable formats improving discoverability.	
Creative Director <i>Wesualize Studios – Kochi, India</i>	Nov 2023 – Feb 2024
- Led creative direction for VFX advertising projects from concept development to execution. - Developed storyboards integrating 3D and live-action workflows. - Directed multidisciplinary teams ensuring cohesive visual output.	
Visual Designer (Freelance) <i>Various Clients – India</i>	Jun 2023 – Oct 2023
- Delivered visual and UX design solutions aligned with user and business goals. - Produced branding and digital assets emphasising clarity and usability.	
Design Intern <i>Tata Consultancy Services (TCS) – Mumbai, India</i>	Jun 2022 – Aug 2022
- Researched user interaction within virtual environments and proposed interaction flows. - Created 3D concepts and visual assets based on research insights. - Presented structured design outcomes to stakeholders.	
Visual Designer <i>YoZu – Mumbai, India</i>	Dec 2020 – Jan 2022
- Designed 3D assets and collaborated with engineers for Unity integration. - Developed production workflows ensuring consistency and quality. - Managed a team of junior artists delivering projects on schedule.	

Hiro — Task Starting Assistant

Product Design, UX, Behavioral Design

[Case Study](#)

- Designed a behavioural productivity system addressing task initiation failure.
- Identified key friction points including low energy, unclear starting points, and delayed urgency through research.
- Developed a system combining task breakdown, energy-based task assignment, and first-step generation.
- Designed interaction flows enabling users to start tasks within seconds.

DUB Transit

UX Design, Information Design, Urban Mobility

[Live Project](#)

- Identified reliability gaps in Dublin public transport affecting commuter decision-making.
- Designed a real-time decision-support interface improving clarity in uncertain conditions.
- Structured journey flows prioritising step-by-step navigation over static timetable systems.
- Translated complex transit data into clear visual hierarchies using user-centered design.

City: Beneath the Surface

Data Visualization, UX Design, Interactive Media

[Live Project](#)

- Designed an interactive system visualising hidden urban infrastructure and essential workers.
- Translated complex systems into accessible visual narratives using information design.
- Developed an exploratory interface supporting user-driven discovery.

AI as Coding Companion — Personal Portfolio Website *UX Design, Front-End Development, AI-Assisted Workflow* [Live Site](#)

- Designed and developed a responsive portfolio using AI-assisted workflows.
- Defined architecture, layout, and interaction flow in Figma.
- Iteratively refined implementation through testing and debugging.
