PRODUCT DESIGNER (UX/UI)

Product Designer with experience in UX/UI, visual communication, and interactive systems. Skilled in transforming complex information into intuitive user experiences through behavioral design and research-driven workflows.

TECHNICAL SKILLS

- Design** : UX/UI Design, Wireframing, Interaction Design, Responsive Design, Information Architecture
- Tools** : Figma, Adobe CC, Blender, Substance Painter
- Web & Interactive:** HTML, CSS, JavaScript
- Creative** : Photography, Storyboarding, Visual Storytelling
- Methods** : User Research, Usability Testing, UX Analysis, Prototyping, Cognitive Walkthroughs

EXPERIENCE

UX Analyst & Content Strategist (Project-Based) Jan 2025 – Mar 2025
Grido (Remote – Munich, Germany)

- Audited an AI-driven content platform through cognitive walkthroughs and rigorous UX analysis, flagging 18 usability issues, including 7 major interaction roadblocks.
- Assessed complex user flows to deliver structured wireframe recommendations that eliminated navigation friction across core user pathways.
- Completely restructured massive automotive datasets for a digital car museum layout, improving information architecture, search findability, and user orientation.

Freelance UX/UI Designer Aug 2022 – Oct 2025
Independent Practice – Mumbai, India & Dublin, Ireland

- Shaped UX and UI systems, wireframes, and responsive layouts for e-commerce platforms and digital products.
- Established scalable design systems and brand architectures that improved production efficiency across client teams.

Creative Director Nov 2023 – Feb 2024
Wesualize Studios – Kochi, India

- Directed creative execution and end-to-end production pipelines for high-profile VFX advertising campaigns, including regional project deliveries for major brands Birla Group and P.F. Chang's.
- Crafted multi-layered storyboards blending complex 3D environments with live-action footage.
- Managed a 3-person on-site production crew, comprising two cinematographers and a drone operator, to guarantee precision execution under tight broadcasting schedules.

Design Intern Jun 2022 – Aug 2022
Tata Consultancy Services (TCS) – Mumbai, India

- Studied interaction patterns in immersive virtual environments to optimize spatial usability and task workflows.
- Produced high-fidelity 3D concepts and assets in Blender informed by user research and prototype testing.
- Presented interactive design frameworks to senior stakeholders for integration into engineering roadmaps.

Visual Designer Dec 2020 – Jan 2022
YoZu – Mumbai, India

- Designed user interfaces and high-fidelity visuals across 25+ interactive screens for an educational application.
- Accelerated asset production pipelines by personally modeling 20 high-fidelity 3D assets in a single week, contributing to a collective team delivery of 100+ production-ready 3D models.
- Collaborated closely with front-end and Unity engineering teams to streamline asset handoff workflows, reducing cross-team integration friction.
- Mentored junior digital artists and tracked key project milestones within fast-paced, agile production sprint schedules.

PROJECTS

Hiro — Task Starting Assistant	<i>Product Design, UX, Behavioral Design</i>
- Designed a behavioral productivity system engineered to reduce task-initiation friction by shifting the UX focus from rigid discipline to energy-aware, micro-step workflows. - Formulated a 4-subsystem core product architecture (Smart Task Breakdown, Energy-Aware Suggestions, Start Mode, and Social Co-Working) rooted directly in Temporal Motivation Theory. - Conducted 27 deep-dive user research interviews and qualitative surveys to isolate primary emotional avoidance behaviors and context-sensitive procrastination triggers among digital-native young adults.	
DUB Transit	<i>UX Design, Information Design, Urban Mobility</i>
- Investigated commuter pain points across Dublin’s public transit infrastructure by executing contextual inquiries and field interviews with active bus and Luas riders. - Shaped a real-time mobile transit interface utilizing highly glanceable route cards to streamline rapid user decision-making during sudden service disruptions. - Validated the interactive prototype via usability tests with 32 target participants, achieving a 100% adoption interest rate while identifying a critical user requirement for an optimized night-use dark mode.	
City: Beneath the Surface	<i>Data Visualization, UX Design, Interactive Media</i>
- Synthesized complex municipal datasets into an interactive, multi-layered visual narrative detailing underground city infrastructure and essential urban workforce data. - Showcased the final interactive installation at a graduation exhibition live for a full week, engaging over 500+ attendees and validating the efficiency of the layered navigation design model through live behavioral observation.	
AI as Coding Companion — Personal Portfolio Website	<i>UX Design, Front-End Development, AI-Assisted Workflow</i>
- Planned and implemented a responsive portfolio site using AI-assisted front-end workflows and iterative prototyping. - Wireframed, mapped information architecture, layout grids, and interaction patterns in Figma before development. - Executed rigorous cross-device QA testing across iOS and Android mobile phones, iPad, Windows laptops, and high-resolution desktops to ensure absolute layout grid and asset consistency.	

EDUCATION

TU Dublin – Ireland	Sep 2024 – Oct 2025
<i>MA Creative Arts – Visual Communication</i>	<i>EQF Level 7</i>
- Concentrated on visual communication, research methodologies, and design for care and urban systems. - Graduation project: Data visualization examining essential urban workers and city infrastructure.	
Indian Institute of Technology Bombay	Jul 2019 – Jul 2023
<i>Bachelor of Design (Communication Design)</i>	<i>Grade: 8.04</i>
- Studied human-centered design, visual storytelling, interactive media, and immersive digital experiences - Graduation project: VR interactive experience involving 3D asset creation and Unity collaboration.	

ADDITIONAL EXPERIENCE

Aircraft Appearance Crew	Jan 2026 – Present
<i>Sky Handling Partner – Dublin, Ireland</i>	
Uphold international safety and hygiene standards within fast-paced aircraft turnaround operations.	
Food & Beverage Associate	Oct 2025 – Jan 2026
<i>St Helen’s Hotel – Dublin, Ireland</i>	
Provided high-volume guest service in a luxury hospitality environment while maintaining operational efficiency.
